

CLAIM AMENDMENTS:

Please amend Claim 1 and add new Claims 30-35 as follows:

1. (currently amended) An earpiece light comprising
an ear support having a radial arm attached to a power supply housing;
said power supply housing having a power supply and a lamp arm with a distal
end; and,
said power supply connected to a light source mounted on the distal end of the
lamp arm.
 2. (original) The earpiece light of Claim 1 where the lamp arm is pivotally
attached to the power supply housing.
 3. (original) The earpiece light of Claim 1 where the lamp arm is extendible.
 4. (original) The earpiece light of Claim 1 where the power supply housing further
comprises a dimmer control for the light source.
 5. (original) The earpiece light of Claim 1 where the power supply housing further
comprises a power switch for the light source.
- Claims 6-24 cancelled.
25. (previously submitted) An earpiece light comprising:
a curved ear support attached to a power supply housing;
said power supply housing having a power supply and a lamp arm with a distal
end; and, said power supply connected to a light source mounted on the distal end of the
lamp arm.
 26. (previously submitted) The earpiece light of Claim 25 where the power supply
housing is detachable from the curved ear support.

27. (previously submitted) The earpiece light of Claim 25 where the lamp arm is extendible.

28. (previously submitted) The earpiece light of Claim 25 where the curved ear support is wearable around a crest of helix of an outer ear.

29. (previously submitted) The earpiece light of Claim 25 where the curved ear support is flexible.

30. (new) An earpiece light comprising:
a curved ear support attached to a power supply housing;
said power supply housing having a power supply and a lamp arm with a distal end; and, said power supply connected to a light source mounted on the distal end of the lamp arm;
the light source having at least one light emitting diode of at least 3 volts.

31. (new) The earpiece light of Claim 30 where the distal end of the lamp arm further comprises a glare shield.

32. (new) The earpiece light of Claim 30 where the distal end of the lamp arm further comprises a pivotal glare shield.

33. (new) The earpiece light of Claim 30 where the power supply housing has a center and the curved ear support further comprises a radial arm attached to the center of the power supply housing.

34. (new) The earpiece light of Claim 33 where the radial arm is pivotally attached to the center of the power supply housing.

35. (new) The earpiece light of Claim 30 where the power supply housing further comprises a dimmer control for the light source.
